

API EXPORT Automation Hub

Official 2-Minute Video Demonstration Script & Internship Submission Guide

INTERN CANDIDATE
Boddeda Vignesh

SENDER ACCOUNT
boddedavignesh3@gmail.com

PROJECT DOMAIN
Export Trade & B2B Outreach

TARGET EXPORT ITEM
Singing Bowls

System Architecture: Modular Flask B2B pipeline designed to discover verified international buyers across multi-channel APIs, validate contact data, segment leads via Gemini AI, and dispatch automated, personalized Gmail outreach with attached catalog presentations (company_presentation.pdf) over secure SSL SMTP (Port 465).

Key Metrics: All 9 Integration Tests Passing (100%) • Zero Lint/Config Defects • WCAG AA Accessible Contrast (5.1:1+) • 1-Click Verification Demo.

SECTION 1 2-Minute Video Recording Script (Word-for-Word Narration)

TIMESTAMP	ON-SCREEN ACTION (WHAT TO SHOW & CLICK)	SPOKEN NARRATION (SPEAK CLEARLY AT ~130 WPM)
0:00 – 0:20 (20 seconds)	Screen: Start on Dashboard Home (http://127.0.0.1:5000/). Show the brand title and point cursor at the prominent electric-blue "Search for Buyers" hero CTA.	"Hello everyone! Welcome to my presentation of the API Export Automation Hub — an automated end-to-end B2B pipeline designed to help export businesses discover international buyers, validate contacts, and scale personalized email outreach with zero manual friction."
0:20 – 0:45 (25 seconds)	Screen: Scroll to the Top-Accent Stat Cards. Focus on "Trigger Discovery Run" form with keyword Singing Bowls. Click "Start Discovery Pipeline", and show the leads table populating with verified buyer details.	"Our workflow begins with Multi-Channel Discovery. By querying search adapters across Google, social directories, and web listings, the system collects verified global buyers dealing in target export products like Singing Bowls — capturing contact names, emails, countries, and source provenance in real time."
0:45 – 1:10 (25 seconds)	Screen: Click "AI Classify" in top navbar. Show the Gemini AI classification view dividing leads into Corporate Business Accounts vs. Webmail Individual Contacts .	"Next, the data passes through our AI-assisted classification engine powered by Google Gemini. It deduplicates incoming leads and categorizes them into high-value corporate business accounts versus individual contacts, allowing us to tailor our export communication strategies effectively."
1:10 – 1:35 (25 seconds)	Screen: Click "Send Campaign" in navbar. Click green "Send Test to My Email" button. Switch Tab: Open Gmail inbox showing received email with subject, dynamic tokens, and the company_presentation.pdf attachment!	"For outreach, our system connects directly to Gmail over secure SSL SMTP. It enforces strict rate limiting, throttle delays, and duplicate prevention. Here, you can see our automated outreach email delivered live to the inbox — complete with dynamic personalization tags and our official company product catalog PDF automatically attached!"
1:35 – 2:00 (25 seconds)	Screen: Switch back to dashboard. Click "Reports" showing delivery metrics and suppression list, then glance at the interactive "API Explorer" (/api-docs).	"Finally, our Reporting module logs every send, tracks deliverability metrics, and respects suppression lists with automated CAN-SPAM compliant opt-outs. We also provide a full REST API for third-party integrations. Thank you for watching!"

SECTION 2

Internship Submission Deliverables & Screenshot Checklist

1. Dashboard Home & Hero Section

Capture / showing the redesigned hero section, electric-blue CTAs, and the 4 top-accented stat cards with timeframe badges.

2. Multi-Channel Lead Discovery Table

Show the "Recently Discovered Leads" table with populated rows (Singing Bowls, USA, UK, Google/Facebook source tags, and website links).

3. Gemini AI Contact Classification

Navigate to /classify and capture the Business Accounts list alongside Individual Accounts with AI auto-classification status.

4. Real Gmail Delivery Proof (Attachment)

Open Gmail showing the delivered email from boddedavignesh3@gmail.com with personalized body text and company_presentation.pdf attached.

5. Campaign Analytics & Suppression

Capture /report demonstrating total targeted contacts, 100% delivery success rate, outbox audit log, and opt-out suppression counts.

6. REST API Explorer (`/api-docs`)

Capture the interactive API explorer testing /api/buyers, /api/buyers/search, and /api/stats endpoints.

SECTION 3

Video Recording & Presentation Pro-Tips

Key Recommendations for Maximum Evaluation Score:

- **Pre-Load Tabs:** Keep your Gmail inbox already logged in on a second browser tab. Switching to it at 1:15 demonstrates live deliverability without any lag or downtime.
- **Resolution & Zoom:** Record at 1080p (1920×1080) with browser zoom at 100% or 110% so the table data, badges, and code snippets are razor sharp.
- **Audio Clarity:** Use a headset or dedicated microphone in a quiet room. Speak with confidence, pacing your delivery at ~130 words per minute.
- **Demonstrate Value:** Emphasize the end-to-end automation: how discovering leads connects directly to verified Gmail delivery with catalog attachments.

SECTION 4

Pipeline Technical Architecture & Test Verification

• **Flask Daemon:** Active on 127.0.0.1:5000

• **Gmail SMTP Auth:** SSL Port 465 Verified

• **Catalog Attachment:** PDF Attached & Verified

• **Integration Suite:** 9/9 Tests Passed (100%)

• **Accessibility:** WCAG AA Compliant (5.1:1+)

• **Typography:** Google Font Inter & FontAwesome 6
